

Health Care

For more than 25 years, Pullman & Comley has been active in the health care industry and has helped a broad range of health care providers address their myriad business and regulatory challenges.

Our Health Care practice serves Hospitals and Health Care Institutions as well as Physicians and Other Health Care Practitioners. Members of our Health Care practice are supported by attorneys from our Real Estate, Labor and Employment, Employee Benefits, Public Finance and White Collar Defense and Corporate Investigations groups to provide a full range of legal services.

We represent hospitals, community health centers, nursing homes, home health agencies, rehabilitation facilities, substance abuse facilities, physicians and group practices, and are well versed in the complex rules that govern every aspect of the health care system.
