

Helping to Deliver Clean and Affordable Renewable Energy

Tobacco Valley Solar

Our team was involved in the Tobacco Valley Solar Project, a 26-megawatt solar farm in Simsbury, Connecticut. We represented Tobacco Valley Solar with the permitting and siting of the solar generation facility and in project-specific affiliate entities in connection with filing an application with the Connecticut Siting Council for the project. The firm's knowledge base and ingenuity in all areas of the engagement, particularly in siting and permitting matters, resulted in approval of the project by the Connecticut Siting Council. In obtaining that approval, we worked with our client and other project constituents in a collaborative matter to achieve success.
